What is the quality of the maid?

We send maids expecting them to provide the best service but at times they are not able to adjust to certain households and can due to nervousness or ill health start behaving odd. It’s a request to our clients to be a bit tolerant and explain situations coolly so that they are back to their normal selves soon. After all they too need a word of encouragement and patience to put in their best. Leaving home / their children / and many other problems they are with you to earn a livelihood so try to teach them your ways as every house has a different need and it takes the maid time to learn and get used to a new family.

Will she have a sound health?

As human beings they too need food and rest. So make sure they get to eat and a chance to sleep or rest too! No CARE maid should be made to work after 11pm. However if there is a special occasion being celebrated in the house, then for that day or on those occasions a late night is acceptable and the maid too will not object.

Are they good at taking instructions perfectly well?

Almost 75% of the maids sent from Kolkata do not know how to converse in Hindi although some may understand the language. So try to help her by guiding her and trying to understand where she is going wrong.

For CARE

I have accepted the above terms and conditions and have understood all the above points in each and every page of this form, and promise to abide by the terms and conditions mentioned above.
